

## Environmental Policy

This Policy is to confirm the Ottawa International Airport Authority's (OIAA) commitment to corporate environmental stewardship and sustainability for airport operations and development. The Policy also includes the OIAA's commitment to support work communities, stakeholders, employees, contractors and airport users.

As part of this Policy, the OIAA will:

- Comply with all environmental legislation, legal requirements and sustainability commitments adopted by OIAA.
- Monitor and report on environmental and sustainability performance.
- Provide communication on the OIAA's environmental and sustainability performance.
- Provide ongoing training and awareness activities.
- Include environmental and sustainability considerations in Authority decisions related to land use planning, airport development, resource planning and purchasing.
- Implement and maintain environmental and sustainability objectives and targets aimed at continuous improvement focusing on:
  - Greenhouse gas emission reduction by following the Environment and Climate Change Canada (ECCC) Net-Zero Challenge and Airport Carbon Accreditation programs;
  - Waste reduction and diversion;
  - Water use reduction;
  - Environmental protection and ecosystem health, without compromising safety;
  - Environmentally responsible handling and use of materials and resources used in airport operations and development.

### POLICY APPROVAL

This Environmental Policy is hereby approved.
